HTML5, CSS, JavaScript, PHP

Communication

Observation

Data Analytics Tools

Microsoft Excel, pandas, Matplotlib, Jupyter Notebook, SQL, Power BI

Database Management tools

Mysql, phpMyAdmin

PROJECTS

Movie Ticket Booking Application

An application developed by me, that differs from the existing ones, where users often find themselves juggling between multiple booking platforms, limiting their choices based on where certain theatres are available. This new system eliminates this inconvenience entirely, allowing users to browse, select, and reserve seats in nearby theatres regardless of the booking platform.
